

Technical Author – Farnborough, UK

IDEX ASA, a leading developer of fingerprint sensor devices, is growing capability in Farnborough. We are looking for an experienced Technical Author to build a technical authoring function within our organization.

You will report to the Director, Applications Engineering, and work closely with multiple internal teams to deliver documentation solutions.

Tasks and responsibilities:

- Document/Template authoring
- Document approval/change management
- Documentation project management
- Writing/Editing alongside product architecture team
- Identify tools and define processes to complete tasks efficiently
- Ensure coherent and professional communication with peer groups
- Coordinate and cooperate with applications, marketing, product management, product development and product test teams
- Ensure timely status reports on projects
- Support existing and future projects
- Ensure timely and successful delivery of projects

Required Experience:

- Work within a multi-disciplined team
- Worked with document authoring tools

Desirable Experience:

- Previously authored documents for the microcontroller or semiconductor industries
- Capacitive sensing technologies, e.g. touch or fingerprint
- Biometric products
- Recent mobile handset or IoT experience is highly desirable

Education:

- Technical college or university level

Personal capabilities:

- Highly motivated and excited by the prospect of working on innovative technologies in a fast-paced environment
- Ambitious; able to work independently; self-assured and outgoing; dependable and able to deliver
- Creative, pragmatic and easy to work with
- Enjoys responsibility for a diverse portfolio of projects and assignments
- Excellent communication skills
- Quality conscious with an eye for detail
- Structured and documented work methods

Work place:

Full-time position in Farnborough, UK.

Travel activity:

No significant travel expected, but working hours will require flexibility to enable coordination with international teams in China, Europe and the United States, east and west coast.

IDEX ASA:

IDEX ASA specializes in fingerprint imaging and recognition technology. IDEX's vision is to ensure individuals a safe, secure, and user-friendly use of personal ID.
